7. The top 6 finalists will be announced just after the Prejudging.

Article 13 – Prejudging: Assessing of Round 2 (Quarter Turns)

13.1 Assessment of Round 2:

In general, the assessment of women's physique in Women's Acrobatic Fitness is based on the same criteria like in Women's Bodyfitness:

1. The judge should first assess the overall athletic appearance of the physique. This assessment should begin at the head and extend downwards, take the whole physique into account. The assessment, beginning with a general impression of the physique, should take into consideration the hair and makeup, the overall athletic development of the musculature; the presentation of a balanced, proportionally and symmetrically developed physique; the condition of the skin and the skin tone; and the athlete's ability to present herself with confidence, poise and grace.

2. The physique should be assessed as to its level of overall muscle tone, achieved through athletic endeavors and diet. The muscle groups should have a round and firm appearance with a small amount of body fat. The physique should neither be excessively muscular nor excessively lean and should be free from deep muscle separation and/or striations. Physiques that are considered either too muscular or too lean must be marked down.

3. The assessment should also take into consideration the tightness and tone of the skin. The skin tone should be smooth and healthy in appearance, and without cellulite. The hair and makeup should complement the "Total Package" presented by the athlete.

4. The judge's assessment of the athlete's physique should include the athlete's entire presentation, from the moment she walks onstage until the moment she walks offstage. At all times, the female fitness competitor must be viewed with the emphasis on a "healthy, fit, athletic looking" physique, in an attractively presented "Total Package".

APPENDIX 1

HOW TO ASSESS A WOMEN'S ACROBATIC FITNESS COMPETITION

INTRODUCTION:

Judges are strongly reminded that they are judging a WOMEN'S ACROBATIC FITNESS competition. The extreme muscularity, vascularity, muscular definition, and/or dieted leanness will not be considered acceptable if displayed by a fitness competitor and therefore, must be marked down.

GENERAL PRESENTATION:

Judges are reminded that the competitor's posture and bearing, at all times while onstage, is to be considered. The overall image displayed should demonstrate poise, femininity and self-confidence. This is especially true at all times when the competitor is standing in the line-up and during the comparisons of the quarter turns.

When standing in the line-up, the competitors shall be warned against adopting a tense pose, like during performing of the quarter turns, displaying the muscularity.

A relaxed stance in the line-up means that the competitor will:

- stand erect, front to the judges, with arms hanging at the side and feet together, or
- stand with the body slightly turned, left side to the judges, so the start number of a competitor will be clearly visible, right hand resting on the hip and left leg slightly moved forward and to the side.

Head and eyes towards the front, shoulders back, chest out, stomach in.

On the IFBB Chief Judge command, competitors standing in the line-up should perform the Front Position.

QUARTER TURNS

Competitors who fail to adopt the proper stance will receive one warning after which points will be deducted from their score.

Front Position:

Erect stance, head and eyes facing the same direction as the body, heels together, feet inclined outward at a 30° angle, knees together and unbent, stomach in, chest out, shoulders back, both arms kept at the side along the centerline of the body, elbows slightly bent, thumbs and fingers together, palms facing the body and hold about 10 cm out of the body, hands slightly cupped.

Quarter Turn Right (left side to the judges):

Erect stance, head and eyes facing the same direction as the body, heels together, feet inclined outward at a 30° angle, knees together and unbent, stomach in, chest out, shoulders back, left arm kept slightly back from the center-line of the body with a slight bend at the elbow, thumb and fingers together, palm facing the direction of the body, hand slightly cupped, right arm kept slightly front of the center-line of the body with a slight bend at the elbow, thumb and fingers together, palm facing the body, hand slightly cupped. The positioning of the arms will cause the upper body to twist slightly to the left, with the left shoulder lowered and the right shoulder raised. This is normal and must not be exaggerated.

Quarter Turn Back:

Erect stance, head and eyes facing the same direction as the body, heels together, feet inclined outward at a 30° angle, knees together and unbent, stomach in, chest out, shoulders back, back muscles slightly contracted to show the shape of the upper body, both arms kept at the side along the centerline of the body, elbows slightly bent, thumbs and fingers together, palms facing the body and hold about 10 cm out of the body, hands slightly cupped.

Quarter Turn Right (right side to the judges):

Erect stance, head and eyes facing the same direction as the body, heels together, feet inclined outward at a 30° angle, knees together and unbent, stomach in, chest out, shoulders back, right arm kept slightly back from the centerline of the body with a slight bend at the elbow, thumb and fingers together, palm facing the direction of the body, hand slightly cupped, left arm kept slightly front of the center-line of the body with a slight bend at the elbow, thumb and fingers together, palm facing the body, hand slightly cupped. The positioning of the arms will cause the upper body to twist slightly to the right, with the right shoulder lowered and the left shoulder raised. This is normal and must not be exaggerated.

Assessment of women's physique in the quarter turns

In general, the assessment of women's physique in Women's Acrobatic Fitness are based on the same criteria like in Women's Bodyfitness. The assessment, beginning with a general impression of the physique, should take into consideration the hair and makeup; the overall athletic development of the musculature; the presentation of a balanced, symmetrically developed physique; the condition of the skin and the skin tone; and the athlete's ability to present herself with confidence, poise and grace.

The physique should be assessed as to its level of overall muscle tone, achieved through athletic endeavors. The muscle groups should have a round and firm appearance with a small amount of body fat. The physique should neither be excessively muscular nor excessively lean and should be free from deep muscle separation and/or striations. Physiques that are considered either too muscular or too lean must be marked down.

The assessment should also take into consideration the tightness and tone of the skin. The skin tone should be smooth and healthy in appearance, and without cellulite. The face, hair and makeup should complement the "Total Package" presented by the athlete.

The judge's assessment of the athlete's physique should include the athlete's entire presentation, from the moment she walks onstage until the moment she walks offstage. At all times, the fitness competitor must be viewed with the emphasis on a "healthy, fit, athletic" physique, in an attractively presented, impressive "Total Package".

APPENDIX 2**ASSESSMENT OF THE ACROBATIC FITNESS ROUTINES**

In this rounds, athletes perform an acrobatic fitness routine to music selected by the competitor, the length of which shall not exceed 90 seconds.

Once again, the judge should consider the OVERALL IMPRESSION, that is, the entire routine from the moment the athlete presents herself onstage until the moment the athlete walks offstage. The judges are reminded that, during these Rounds, they are judging ONLY the fitness routine and NOT the physique. The judge should look for a well-choreographed and creative routine performed at a different tempo/speed. Although compulsory movements are

not a requirement, the routine should include:

1. Elements of STRENGTH - for example, straddle hold, leg extension hold, hand stands, planche and/or one-arm pushups (gymnastic movements such as front and back flips, handsprings, and cartwheels are not considered strength elements). The number of strength moves, their degree of difficulty, and the overall creativity of the moves should be considered in the judging of the routine.
2. Elements of FLEXIBILITY – for example, high kicks, bridges, nuts, front and back walkovers, side splits, and/or front splits. The number of flexibility moves, their degree of difficulty, and the overall creativity of the moves should be considered in the judging of the routine.
3. Elements of POWER – dynamic elements like high jumps, front and back flips, handsprings, aerial cartwheels, aerial walkovers, round offs, split leaps. These moves require perfect technique and should be taking into account assessing the difficulty of the routine.
4. The SPEED or tempo of the routine demonstrates a degree of cardiovascular fitness, stamina, and endurance. For example, if two routines contain the same type and number of strength, flexibility and power movements, the routine that is performed at a faster tempo is the more difficult to achieve so long as the movements are correctly performed.

Routines based on the gymnastics moves only should be marked down. Once again, the judge must always consider the “Total Package” and not just the sum of the individual movements. There is a component - an element of “showmanship”, which competitors bring to an acrobatic fitness routine that is unique to them and creates the overall impression. This is their personality, charisma, stage presence and charm, as well as a natural rhythm that should play a part in the final placing of each competitor.
