Dear friends in sport:

The IFBB is an organization that promotes the values of sport, health, and the Fitness lifestyle around the world.

BODYBUILDING & FITNESS ARE:

- Sports
- Successful complimentary training for other sports
- Healthy lifestyle at all ages

Like a sport, the IFBB organizes yearly over 8,000 competitions worldwide, in which athletes from very young ages in children fitness categories to our master bodybuilding champions, represent the maximum expectation of human physical muscular development in healthy harmony.

As complementary training for other sports, helps the athletes to become stronger, optimizing muscular density at the ideal performance body weight, to achieve his/her maximum potential.

The Bodybuilding and fitness lifestyle is followed by millions of people worldwide.

Regardless of age, gender, and previous physical condition, bodybuilding training, and nutrition can help individuals to achieve stronger, balanced bodies with proper control of body fat and in good health.

Bodybuilding and fitness weight training and nutrition techniques are great allies of physiologists, physiotherapists, and the medical community to prevent and recover from injuries, accidents and maintain the muscular body functions in better condition for a longer time.

Bodybuilding and fitness are excellent support for anti-aging. In fact, the aging process is expressed physically by the progressive deterioration of lean body mass, and it is represented by the progressive loss of muscles with an increase of fat and connective tissues, which brings the ultimate musculoskeletal and physical deterioration.

Numerous scientific research already proved the great efficiency of fitness training and nutrition to prevent and/or reverse this process. Recent studies have even shown that strength training can cause a functional reversal of aging at the molecular level, “repairing” very poorly functioning genes of elder people.

Nothing else in human history has shown a similar effect! The best visual example of it, is our athletes over 60 and plus years old, and their healthy muscular bodies.

The IFBB is very conscious of all these capacities of our sport and includes in its board a Scientific and Research Commission, working with scientific and university institutions worldwide in the elaboration of reports, participation in symposiums and congresses, and promoting antiaging fitness lifestyle in the society.

The IFBB is pleased to be active in all these areas in the strong belief that physical health is a great contribution from sport to society.

Wishing you all the success, in sport and in life,

Warmest regards,

Dr. Rafael Santonja
IFBB President
**IFBB CATEGORIES**

**Fitness Challenge**

Fitness Challenge, the new IFBB category.

This new category includes different physical exercises to display the athletic ability of athletes, and it’s destined to have great success in gym competitions, and in major international events.

The event consists in a circuit of six stations (exercises), in which the competitors perform as much repetitions as they can in a 2 minutes session, of each exercise, making a competition of excellent visual impact, full of emotions, and great dynamism, in which athletes may compete individually, by couples, or by teams (6 persons per team).

A new initiative of the International Federation, with an already excellent implementation and popularity in all over the world.

**Women’s Wellness Fitness**

The Wellness Fitness division is intended for women who prefer a muscular physique without muscle separation, athletic and aesthetically pleasing, with a bigger body mass than in Bikini Fitness. From this point of view, Wellness Fitness is placed somewhere between Bikini Fitness and Women’s Physique.

Assessing of the physique, judging criteria and rounds are the same like Women’s Bikini Fitness. Competitors perform quarter turns in all rounds plus individual “I-walking” presentation in the finals. Vertical proportions (legs to upper body length) are ones of the key factors. Horizontal proportions (hips and waist to shoulder width) may favour women with a bit bigger hips, thighs and buttocks. There are four Wellness Fitness categories: up to 156 cm, up to 163 cm, up to 168 cm and over 168 cm.

**Fit-Pairs**

Fit-Pairs is the latest IFBB sport division, introduced in 2020 and approved by the IFBB International Congress. It is devoted for Women’s Bikini athletes and Men’s Physique competitors to create for them the possibility to perform as a couple. Fit-Pairs athletes don’t perform poses like in Mixed-Pairs division and there is no posing routines. They display their physiques, body lines and body quality by performing four quarter turns. Men from the Fit-Pairs perform the Quarter Turns in the same manner like in Men’s Physique, while women perform these turns in the same style like in Women’s Bikini. Men competitors will wear the same attire like in Men’s Physique, Women competitors will wear the same attire like in Women’s Bikini. The judge will assess each Fit-Pair as an entity. Those whose physiques match, harmonize, and complement each other will receive higher places than Fit-Pairs whose physiques are markedly dissimilar and unbalanced, as would be the case of a tall ectomorph male and a short mesomorph woman, or vice versa. In the Finals, Fit-Pairs perform also I-walking presentation, lasting no longer than 20 seconds, and then four Quarter Turns.

**Athletic Fitness**

The lineup is composed by 15 athletes, in a sports discipline that combines various elements of strength, endurance as well as balanced physique. The event is composed by Rounds:

- Round 1 (Physique Round; Quarter Turns).
- Round 2 (Strength Round; Pullups and Dips).
- Round 3 (Endurance Round; Ergometer rowing).
- Finals Round 4 (Physique Round; Quarter Turns).
- Finals Round 5 (Strength Round).
- Finals Round 6 (Endurance Round).
Women’s Bikini-Fitness

This category has been introduced in 2011 and is aimed at women who keep their body in shape and eat healthy. Overall body lines, balance and proportions, body tone and healthy appearance are taken into consideration. High-intensity weight training and hard, lean muscles are not necessary. The emphasis is on a well-shaped, fit, healthy and attractive appearance, similar to that of models.

Competitors are assessed in two rounds, wearing a two-piece bikini and high-heels. In both rounds, quarter-turns, including front, back and both sides stance, are performed. As well, the final round begins with “I-walking”, which gives each competitor a chance to present her body and her charm on the move.

This competition started with one open class and – due to the extreme popularity – expanded to eight body-height categories nowadays: 158 cm, 160 cm, 162 cm, 164 cm, 166 cm, 169 cm, 172 cm and over 172 cm.

Men’s Physique

In 2012 the Men’s Physique division was officially launched as a new IFBB sport discipline. It proves to be a very popular category, so the IFBB has increased the number of Men’s Physique categories from 2 (two) to 6 (six): 170 cm, 173 cm, 176 cm, 179 cm, 182 cm and over 182 cm. They perform two rounds of quarter turns, wearing board shorts of their choice. The final round (Round 2) begins with a short individual onstage presentation of each competitor.

It is aimed at men who do weight training, keep fit and eat a healthy balanced diet, but who prefer to develop a less muscular, yet athletic and aesthetically pleasing physique.

They are fit looking contestants who display proper shape and symmetry, combined with some muscularity and good overall condition. The athletes should have stage presence and poise and their personality and ability to present themselves onstage with confidence, should be visible.

In 2016 IFBB introduced one open category of Muscular Men’s Physique intended for competitors with slightly bigger masculinity than accepted in the regular men’s physique.

Women Bodyfitness

Bodyfitness has been implemented by the IFBB in 2002 to give a chance to compete for wide group of shapely women without the routine rounds, just the physique ones. This formula has proved to be useful and the number of participating contestants increases each year. Later on IFBB created for them the possibility to show their figure in motion during a short individual onstage presentation called “I-walking”.

Currently, there are two rounds of quarter turns in the bikini-style costume of their own choice and classic stiletto pump of any color. At the beginning of Round 2 (finals) top 6 competitors perform individual “I-walking” presentations and then quarter turns as group.

In all rounds judges should assess the overall athletic appearance of the physique, taking into account symmetrically developed physique, muscle tone and shape, with a small amount of body fat, as well as the hair, makeup and individual style of presentation, including personal confidence, poise and grace. This sport discipline is widely open for all well-shaped women working out in the fitness centers and following the healthy sport diet. And they take the advantage of it! Like in fitness, subscorers from the final round are used to get the final total and places. There are four body height categories: 158 cm, 163 cm, 168 cm and over 168 cm.

Women Fitness

This concept has been introduced by the IFBB in the early 90’s, starting as official competition in 1996 in response to the increasing demand for competitions for women who prefer to develop a less muscular, yet athletic and aesthetically pleasing physique and also to show their physiques in motion. In Women Fitness, the emphasis is placed on a shapely, athletic-looking physique, assessed by comparisons of four quarter turns and athletic ability, assessed during a very attractive and dynamic fitness style routine. Currently, there are two Women’s Fitness categories: up to 163 cm and over 163 cm.

The judges are looking for strengths elements, flexibility movements, high tempo, technical perfection, elegance and grace. Competitors may use small props, associated with their attire.

As it is a physique sport as well, there are also two physique assessment rounds beside this artistic routine rounds. In Round 1 and 3 competitors perform four quarter turns in bikini suit, during which the judges assess their figures and body contours, bodypart shape, bodyfat level, body firmness and muscle tone, overall stage presentation (self-confidence, poise, coordination of movements) as well as the overall style of presentation.

Eliminations (if more than 15 athletes), Round 1 (comparisons in quarter turns) and Round 2 (90-second routine) are performed during the Prejudging. In the finals, the top 6 competitors perform their posing routines once again (Round 3) and then quarter turns (Round 4). The subscorers from these two final rounds are summed up to create the total and final places of the competitors.
Children Fitness

Children Fitness is the only IFBB sports division available for children, with no lower age limit. The upper age limit is 16 years old. Then children move to the junior age division.

Children Fitness is one of the most beautiful categories, in a familiar environment, as it is mandatory for the athletes to have the mother (that is usually also an IFBB athlete), as the coach, and therefore IFBB Children Fitness events are a wonderful celebration, plenty of fitness lifestyle families, in which the kids, following the steps from their parents, start their sport carriers, to become later on the champions of the future.

The Children Fitness routine may be a demonstration of talent, personality, and athletic coordination.

Women’s Physique

This IFBB division was introduced with the beginning of 2013 for women who want to prepare heavier, bodybuilding-style body but not extremely dried, lean and muscular, yet athletic and aesthetically pleasing.

Altogether, there are 3 rounds. In round 1 (semi-finals) competitors’ physiques and muscularity are assessed during quarter turns and four compulsory poses. In the finals compulsory poses and the posedown are performed in round 2 and a short, 30-second posing routine to music of competitor’s choice in round 3.

This sport is placed somewhere between Bodyfitness and former Women Bodybuilding, which has been removed from the IFBB list of official categories in 2013.

Competitors are expected to present the overall athletic development of the musculature but also balanced and symmetrical development of all muscle groups as well their sport condition and quality, with visible separation between them.

There are two categories in this division: up to 163 cm and over 163 cm.

Women’s Fit Model

New IFBB sport, new possibilities, new challenge.

This IFBB new sport discipline is intended to display the beauty of the human body in a bit different way than in already existing divisions. To create this possibility, an additional, new round was added in both men and women categories, combining sport qualities with elegance of moves, gestures and a kind of “showmanship”, wearing non-sport attire. In women’s categories it is an evening gown. The Fit-Model competitors must be viewed with the emphasis on a “healthy and balanced” physique, in an attractively presented, impressive “Total Package”. Competitors must demonstrate their grace, poise, elegance and sophistication. The gown will.

In the first three rounds athletes wear a one-piece, tight-fitting swimsuit. This attire was specially selected to enable competitors to have a softer midsection, displaying rather attractive body lines and a bit of personality.

Judges should pay attention to the overall appearance of a competitor, the overall body development and shape, proportionally and symmetrically developed, complete physique, the hair and facial beauty, the athlete’s ability to present herself with confidence, poise and grace and the general impression made by the competitor.

Mixed Pairs

Mixed-Pairs was officially recognized as by the IFBB a sport discipline in 1983 as a bodybuilding mixed pairs.

Men from Mixed-Pairs perform mandatory poses in the same manner like in Men’s Bodybuilding, while women perform these poses in the same style like in Women’s Physique. Men competitors wear the same attire like in Men’s Bodybuilding, women competitors wear the same attire like in Women’s Physique.

Mixed Pairs competition consists of three rounds: Round 1 in the semifinals (comparisons) plus Round 2 (mandatory poses) and Round 3 (posing routine) in the finals.

In the Mixed Pairs category judges assess the overall physique of both partners for the degree of proportion, symmetry, muscle size and quality (density, separation) as well as skin tone. The couple will also be assessed as a unit with particular attention being given to how well their individual physiques complement each other and how well they move in unison.

In the routine round judges pay particular attention to how well each couple display their physiques to music. Judges will look for a smooth, artistic, and well-choreographed routines which may include any number of poses; however, the mandatory poses must be included. The couple must also include intermittent pauses so as to display the muscular development of their physique.
Bodybuilding
Athletes train to develop all bodyparts and muscles to maximum size but in balance and harmony. There should be no “weak points” or underdeveloped muscles. Moreover, they should follow a special pre-competition training cycle, to decrease the bodyfat level as low as possible and remove the underskin water to show the quality of muscles: density, separation and definition. Who can display more muscle details is scoring higher at the contest. And the other matter to be assessed is general view of the physique, which should be proportionally built. It means broad shoulders and narrow waist as well as adequately long legs and shorter upper body. These qualities are displayed during two physique assessment rounds when competitors do 7 mandatory poses during comparisons of 3 to 8 athletes proposed by the judges. Athletes perform barefoot, in posing trunks. There are 7 bodyweight categories for men: 65 kg; 70 kg; 75 kg; 80 kg; 90 kg; 100 kg and over 100 kg. There is also a routine round when athletes can show their physique during 60-second free posing routine performed to the music of their choice. It is an attractive, artistic presentation, including compulsory and non-compulsory poses and other type of movements. There are three rounds. In each round each panel judge must put the competitors in order, giving them individual places from the first to the last.

Classic Bodybuilding
It is a version of bodybuilding for those male athletes who don’t want to develop their muscles to their “extreme” full potentials but prefer lighter “classic” physique.

To create the equal chances to them, the competitors’ bodyweight is limited according to their body height, following the special IFBB formula for each body height category (currently there are five categories: 168 cm; 171 cm; 175 cm; 180 cm and over 180 cm).

Since muscle mass is limited, special attention is paid to the overall look of the physique, body proportions and lines, muscle shape and condition (density, bodyfat level, definition and details).

These values are assessed by the judges during Round 1 and 3. In Round 2, like in bodybuilding, free posing routines are performed to music of athlete’s choice.

Classic Physique
This new concept in our Bodybuilding modalities is a different version of the Classic Bodybuilding. The relationship between height and weight is different, more kilos, and the criteria worths basically in the old, classic look. Even more, the attire is a retro style one, a short with a minimum long sides of 15 cms. Bodies must be classic V shape look, well proportionated, more artistic way to pose. The vacuum pose is the key pose in this division, where a tiny waist is very important in the total physique score. This sport division is growing in every contest under IFBB in despite of being born only months ago.

Classic Physique want to show again the classic look that in the 60’s and 70’s years in the last century did famous our sport, Bodybuilding. In fact the competition system is doing two news poses; Vacuum pose; famous in the older era of 50’s to 60’s, the reason for this is easy; avoiding distended bellies and this movement is specially able to show who is the one with problems in this pose. The second new one pose is not only ONE pose, to the calling voice “your favorite classic pose” you can do whatever pose you consider to do. You can not repeat poses and you can not pose to the rear.

This way the athlete is free to show his best side to the judges. Muscle size, classic physique look, tiny waist, rounded muscles, good shoulders and abdominals are the main weapons among the winners.

Wheelchair Bodybuilding
The IFBB wanted to create a division to enable male wheelchair users to compete in national and international events, including continental and World Championships.

Athletes train to develop all upper body parts and muscles to maximum size but remaining in balance and harmony, avoiding “weak points” or underdeveloped muscles.

Preparing for a competition, they decrease their body fat level and remove the underskin water to show the quality of muscles: density, separation and definition.

They display muscles during seven mandatory poses as well as the posing routine which lasts 60 seconds. The athletes perform all rounds seated on the wheelchairs, wearing long pants and sport shoes.

Currently, one open category is performed.

Games Classic Bodybuilding
Was introduced by the IFBB in 2016. It is intended for less muscular men, with smaller bodyweight limits, what is the only difference compared to Classic Bodybuilding. There are two categories in Men’s Games Classic Bodybuilding: up to 175 cm and over 175 cm.
IFBB WORLD CHAMPIONSHIPS
Within the programme of the 75th IFBB World Championships held from November 3 to 8 2021, the “Fitness Capital of the World” also hosted the competition for athletes between the ages of 16 and 23. Santa Susanna takes over from the Romanian town of Cluj-Napoca, which hosted the 2020 edition and did a fabulous job in the midst of the Covid-19 pandemic. With a much improved international health situation, the Junior Bodybuilding and Fitness World Championships grew significantly in number of participants. The excellent infrastructures of Santa Susanna advised to celebrate a unified event in this location. No less than 31 countries managed to place athletes in the finals, where the Slovak Federation prevailed in the team competition, supported by its mastery in the Fitness disciplines.

OVERALL CLASSIC BODYBUILDING:
Albert Mufturel (Romania)

The aesthetic Albert Mufturel (Romania) took the overall title, also by unanimous decision of the judges (5 points).
There was an important renewal to this discipline. As in 2020, all the medallists presented youthful and toned physiques, with the right size and healthy appearance. Japan came close to taking the title with the formidable 49-year-old Yoshitake Tamura losing by 1 point to 40-year-old Christian Heimerdinger (Germany).

At 50, Nataliia Prokhorova continues to achieve the best results of her career. In 2020 she surprised everyone by appearing lighter than in previous events and took the title; in 2021 she appeared even more improved and with enough quality to defeat her great rival, the Russian Natalia Bystrova, 53 years old. Both athletes, who beat 24 other contenders, are a monument to the idea of weight training as anti-aging therapy.

Taking advantage of his youth, Christian Heimerdinger from Germany beat the Japanese Tamura by just 1 point and won the overall title of Men’s Physique.

The opinion of a single judge determined that the overall title should go to Yevheniia Prutskova (Ukraine) in her successful return to competition. At 41 years, in top form, she surpassed the aesthetic Tatiana Mandolina, who has been one of the most successful athletes during the last two seasons.
Again, the Master competition unified their scores between the male and female teams, providing a list of 44 countries that managed to place athletes in the finals. The FBBR team was the winner, due to its dominance in divisions such as Bodyfitness and Bikini, and its regularity in the rest. They prevailed ahead of Poland and Romania, which consolidated their great federative work. In addition, there was a top form comeback, that of Anna Prokhorova, who, at 50, achieved another gold medal in the +45 years class.

There was a very high level in all classes, yet we must highlight the participation of 32 athletes in the category of 40 to 44 years, won by Olga Pyatetskaya, who was close to the overall title as well. She fell short of the great favourite, Mariia Burlaka (Ukraine), who revalidated her 2020 title and proved unattainable. At 36 years, she continues to succeed as an overall athlete dominating the Master division. In addition, there was a top form comeback, that of Anna Prokhorova, who, at 50, achieved another gold medal in the +45 years class.

The FBBR team was the winner, with a total of 4 medals, including 2 golds. At 40, Olga Klimova overcame her age disadvantage against her compatriot Ekaterina Komarova and took the overall title.
Athletes from Europe, Asia and Africa shone at the 2021 World Championships.

One is the year 2020 in which only a few sports, including Bodybuilding, were able to celebrate their most important international competitions. In 2021, the world has finally begun to recover economically and socially, and the IFBB has reached its 75th anniversary with a sensational World Championship. Athletes and officials from 102 countries participated in the event, with a very high sporting level and some classes exceeding 30 participants of the highest level.

The key to success, once again, was the coordinated work between the IFBB and Santa Susanna, promoted by President Santonja and IFBB patron Mayor Joan Campolier. They knew how to create the material conditions to make a security bubble out of the city, supervised by the Medical Commission, which allowed the athletes to give their best. The positive experience could mean that the IFBB World Championships could be held in the same location from now on, establishing the spectacle for the audience and making travel planning easier for the national federations.

Wheelchair Bodybuilding competition continues to grow at the World Championships. Frenchman Julien Camdessoucens achieved his second consecutive title.

Serhiy Royko (Ukraine) achieved the overall title of Men’s Physique. In the picture, with President Santonja and His Excellency Sheikh Abdullah bin Hamad Al Sharqi.

The most important title of the IFBB ended up in the hands of Vladimir Holota. The Slovakian athlete was honoured by President Santonja and IFBB Executive Officer José Ramos.

William Yuri Rodriguez won the Games Classic Bodybuilding Tall class. President Santonja presented him with the medal, in recognition of his career as an exemplary athlete with several medals in Olympic events held in Central America and the Caribbean. Rodriguez is a sports icon in El Salvador.

An excited Farshad Valipour (Iran) celebrates his outright triumph in Classic Physique, accompanied by President Santonja and IFBB Executive Officer Pawel Filleborn.

WOMEN’S PHYSIQUE

A new chapter in the national duel between the Ukrainian and Russian specialists: Once again, the protagonists were Natalia Prokhorova and Natalia Bystrova. With both athletes now in their 50s, their quality remains unquestionable and they still clearly outperform younger athletes.

OVERALL WOMEN’S PHYSIQUE:
Natalia Prokhorova (Ukraine)

At 50, Natalia Prokhorova achieved her greatest success last year and, far from relaxing, she has continued to improve. In another of the several frontal battles fought against the very complete Natalia Bystrova, the opinion of 1 judge (7 to 8 points) decided that the Ukrainian athlete surpassed the Russian. Thus, Prokhorova managed to keep her title as overall champion, thanks to the balance between her muscularity and definition.

SERBIA has traditionally been the venue for the European or World Children Fitness Championships for many years. It was no different also this year. The World Children Fitness Championships held here on the 27th-28th May 2022. This championship has been a huge success and is only a confirmation of the fact that supporting children and young people in our sport is very important.

Thanks to the number of participants, this is a clear record for the last 10 years. More than 90 athletes also registered in the Fitness challenge categories. Unfortunately, this competition ended prematurely due to bad weather. Even so, 43 athletes managed to pass the competition, have a fun and enjoy together with their coaches, parents and all other supporters the sunny morning.

However, the pilot category, which was interesting for all participants, was the Team category, where four teams presented their breath-taking routines and literally lifted the audience from their chairs.

CONTINENTAL CHAMPIONSHIPS
THE 47TH EDITION

of the South American Bodybuilding and Fitness Championship was held in the city of Sao Paulo, the most populous city and metropolis on the Western Hemisphere.

The Brazilian Confederation of Bodybuilding and Fitness and its president, Professor Diana Monteiro, worked for a year so that the nearly 600 attendees, including amateur athletes, professionals, judges and delegates, would have an excellent experience during their stay.

We have the long-awaited and enriching presence of our President, Doctor Rafael Santonja, who accompanied us during the course for judges and the general assembly of the CSFF. Together, we celebrated the recent participation of our sport in the 2022 XII South American Games held in Asunción, emphasizing the importance that the IFBB is present in almost all games of the Olympic circuit in the world.

The more than 400 amateur athletes participated in an event that lasted for 3 exciting days, in which 30 Elite Pro Cards were awarded. Many of the new professional athletes participated in the Show organized for them at the end of the event, where $20,000 dollars were distributed in awards.

We thank all the companies that made this event possible and we invite you to the 48th edition of the championship, to be held in Venezuela.

The Iranian Federation, chaired by Dr. Abdolmahdi Nasirzadeh, hosted the first edition of the Asian Fitness Challenge Championships, as part of the Asian Cup of Bodybuilding & Fitness held on the island of Kish, from March 9 to 12. Local athletes had the opportunity to confirm the excellent level shown at the Fitness Sport Games and at the World Championships that were held in 2021 in Santa Susanna (Spain).

With the good work done by Dr. Sadegh Hashemi (the official responsible for this division in Iran), the championships were a very positive test for athletes and organizers, ahead of the next Fitness Challenge World Championships to be held in Iran in December.

The competition was held outdoors and displayed a very high level. Many of the marks achieved in Santa Susanna were surpassed, showing the evolution in this discipline ahead of a new continental appointment: the IFBB European Championships, where the old continent athletes will be able to test their level against that of the Persian team, in the first week of May.

2022 IFBB Fitness Challenge Asian Championships (Kish, Iran):

The world records are starting to come down

"Omid Mohammad Jani takes the main title with 294 valid reps in the 6 events."

"Omid Kalji is the great contender with 2 medals and several records."

THE OFFICIAL IFBB events of the Central America region with the endorsement of the Central American Confederation of Bodybuilding and Fitness CCAFF have begun.

This past May 15, the "IX Central American Men and Women’s Bodybuilding and Fitness Championship, Tegucigalpa" was held, after 2 years of not holding events due to the Covid-19 pandemic, with Honduras’ capital city of Tegucigalpa hosting the event.

The President of the National Federation of Bodybuilding and Fitness of Honduras (FENAFH), Lic. Francis Lara, stressed that sport in the region continues to grow and a reflection of this is the constant work of athletes, coaches and federations. Proof of this was the quality and presentation of new and experienced athletes in the IX CA Championship.

Honduras took the 1st Place as Central American Champion, El Salvador came in second and third went to Costa Rica. This was the first time that Honduras has obtained this important title.

The event had the support of the Honduran Olympic Committee (COH) and the Autonomous Sports Confederation of Honduras, in addition to the Sponsors and Team of the CCAFF and FENAFH.

“Our message as a federation is to thank the great IFBB family and the CCAFF for giving us the confidence as a country to hold this event; to the athletes from the entire region, especially from Honduras, for representing their country in style and fulfilling the goal, and to each collaborator, official sports institution, judge, official and volunteer who make each presentation a unique event. Thank you.” (Lic. Lara).

Several of the athletes are already classified for the next Central American Games, the most important event in the region, to be held in October this year in Guatemala. Very soon Central America will be participating in this important Olympic event.
Santa Susanna again hosted the event of the year: EBFF EUROPEAN BODYBUILDING & FITNESS CHAMPIONSHIPS 2022

“What a fantastic and excellent organised European Championships 2022, one of the major annual IFBB events back stronger than ever.”

ONE MORE year we were witness of best European athletes who showed highest level of preparation in all modalities. “Symmetry, harmony, muscularity”.

Fitness industry taking huge popularity in the world and in IFBB.

Numbers of participants is growing every year as everyone comes to fight for overall champion title, which after many of them turn professional and start career in IFBB Elite Pro league.

The IFBB World Championships return to Santa Susana.

BRIDGETOWN, the capital of the island of Barbados, was the venue chosen to hold the 49th edition of the IFBB Central American and Caribbean Championships. Despite the serious communication problems that are still dragging on due to the pandemic, the participation of more than 130 amateur athletes together with almost 50 PRO athletes, resulted in three exciting days of competition in the wonderful setting chosen by the Federation of Barbados: the Lloyd Erskine Sandiford Center, which is also a multifunctional medical education centre. The presence of local authorities and the reception that the Prime Minister of Barbados offered to all the participants was the culmination of this competitive weekend.

On Friday afternoon the first divisions of this event met: in Games Classic Bodybuilding, Nicaraguan David Vallejos stood out, showing us that a physique of this discipline can have impressive legs without detracting from his torso and especially his arms. His is a balanced physique that we will surely see in more international events soon.

In the senior divisions of Bodybuilding we had the Salvadoran Jorge Hernández Vasquez as the winner with a super balanced physique where nothing stood out with a very complete development and an adequate definition. Weighing in at 70 kilos, one of the winners of the entire event, the also Salvadoran Edgar Pineda Matamoros, who came as one of the favourites, confirmed that he also continues to progress, as was expected. A physique with strong legs, a femoral that rivals heavyweights, a small and carved waist, good arms where striated triceps and shoulders stood out on par; perhaps his back is the chapter that has to continue improving. Edgar was also the winner of the short class of Classic Bodybuilding although he lost the Overall against the representative of Antigua & Barbuda, Dwayne George.

In the 80-kilo class, local athlete Ramon Broomes won against an impressive line of competitors. Ramon was the winner in a tough fight, but his physique stood out for its massiveness and for his condition, that highlighted his outstanding definition. His physique had no flaws at all, and his arms and legs were one step ahead of the others. Dwayne George from Antigua & Barbuda, in -90 kilos is a super athlete. In addition to being the winner of this class, he was the overall champion of Classic Bodybuilding. No doubt, we're face to face with a special athlete. His back, shoulders, chest and arms would embarrass anyone in his class anywhere in the world. His legs are not bad, but if they improve,
we’ll have someone who will be remembered for many years. Juli Sinclair from Guyana was the heavyweight champion; big and compensated, although he needs to improve his condition. He won in a hard fight against Nicaraguan Yuri Rodríguez, who did not show with the quality that characterizes him.

As regards Classic Physique up to 175 cm, we had the Guyanese representative Haakmat Randal as the winner thanks to his lines. He is probably the most pronounced X-shaped athlete of the entire weekend. His lats and shoulders stood out together with the pumping of his quadriceps, which gave him a superhero silhouette that many dream of. He was also the champion of Junior Bodybuilding and the overall champion of Classic Physique, beating the winner of tall class, Aldaine Taylor from Jamaica, who won thanks to good lines and a marked definition in his torso. Now, he only needs to develop more of his lower body to consolidate medals in future editions of the CAC.

Duncan Corbin from Antigua & Barbuda won Men’s Physique up to 173 cm thanks to his shape and good overall definition. Ricky James from Jamaica was the winner of up to 179 cm and the Men’s Physique Overall. Big and defined abs were at the centre of a physique that had lats, shoulders and pectorals giving James an excellent V shape. Jeveaughn Rosewell from Jamaica was the best overall at 173 cm, where beating fellow Jamaican Akeem Hinds proved far from easy.

In the women’s divisions, Mexico, Guyana and Barbados were the countries that won the Overalls in the different disciplines. Bikini was won by the Mexican Febe Martínez Alonso Moreno thanks to her beautiful lines, muscular balance, an exemplary definition for Bikini, that made her win her class and the overall, and also be fifth in the PRO, to which was invited to compete. Another Mexican was the winner of the 160 cm, Dolores Ivette Martínez, with a first class muscle tone, silhouette and pose, with a body where nothing stood out and ideal proportions. Danielle Gill from Barbados was the champion in 169 cms, and was also unanimously chosen winner by all the judges due to her physique with international proportions, her good posing and her just definition for Bikini. Laura Morville from Saint Martin was the champion in the tall class. She stood out for her proportions, but also especially for her outstanding pose, despite not going 100%; it was still enough for her to be the champion of her class.

The Bodyfitness division was a face-to-face between tall class champion Dionne Thompson, with a more fluid silhouette but with a pleasant musculature, with room for a little more muscle, and short class Natasha Jones, with a more forceful physique but with the right definition and a firm and confident pose. Natasha was ultimately the overall champion.

Wellness had its own name and a new star: the representative of Guyana, Rosanna Fung, who won the Short class and the overall with a beautiful body, an ideal muscle tone and a development of legs / buttocks that made her creditor of the forms that truly represent this discipline, without neglecting the upper part at all. The champion of the tall class was the Jamaican Cherea Clarke, who showed a fantastic form with PRO lines. Perhaps her point of competition should have been more rushed to give more battle in the Overall.

The team award saw Barbados, Antigua and Barbuda and Mexico come in at 1, 2 and 3 position, respectively. We’ll see what happens at the next CAC Cup, which marks the 50th anniversary and will be held in Aruba, in September 2030.

The PRO event had a different name: the Roger Boyce Classic Elite PRO. It was its second edition and promises that the third, by 2023, will break records of participation due to the prize money and the expectations raised, which makes it worthy of being the reference test for the Caribbean and America.
In Women’s Physique, the winner, Aruban competitor Sharleen Hengeveld, stood out. Her muscular balance and her good posing, in addition to her staging with adequate definition, made her the champion.

Bodyfitness raised the quality of the competition, thanks to the first three athletes. The third, Ramona Morgan from Barbados had a beautiful figure, smooth skin and excellent forms; the second, German Larissa Reineld, improved her last form with an outstanding definition, tall and with good structure; the champion, Yureica Navarro from Venezuela, has taken the step from the amateur ranks to being a PRO champion, but with the same weapons: a balanced body, lines that are very suitable for Bodyfitness, elegant posing and top-of-the-line fitness.

The Wellness champion Galimo Militia from Suriname presented good muscular quality, correct forms for Wellness and a definition that is within expectations.

As for Men’s Physique, the participation of the Caribbean athlete from Antigua & Barbuda, Anthony Kempton, stood out, with good shape, excellent abs and outstanding size, as well as Kenroy Christian, who was taller and with a somewhat more evident V shape, good abs and energetic posing, only lacking a little more size. Despite these two great athletes, it was the Jamaican Daniel Houghton who took the victory, and he did so with excellent V shape, great muscular quality, excellent abdomen and a more confident and forceful posing.

In Classic Physique it was another representative from Antigua & Barbuda, Bernard Percival, who took the victory in a very difficult competition. Eight great athletes showed why competing in Classic Physique Professional is not easy for anyone. Any of the top 5 had medal options, and the judges had a hard time. Bernard Percival won due to his physique, which very appropriately is without a doubt Classic: rocky, aesthetic physique, excellent abdominals, grooved shoulders rarely seen, V-shape, classic pose at his time, adequate definition and excellent vacuum pose, he was also the best poser of all – and all of this not having the largest muscle mass. The second, Haakam Randal from Guyana, came from the amateur competition as the overall winner and corresponded to the competitor cut led by Percival: good shape, great V-line, good poser, but still has to speed up his condition.

The Bikini competition was, without a doubt, the toughest and most difficult of all and perhaps the most difficult of all 2022 on the PRO Elite circuit so far. The 2021 PRO world champion from Antigua & Bermuda, Kimberly Percival, once again took gold. Tall, with long legs but with a suitable torso with development of Bikini lines, shoulder width, small waist, good legs and buttocks, although her personal hallmark is that balanced physical condition that makes her difficult to beat and posing that is admirable in every movement. The other two medallists, Leanna Carrington and Michelle Seaforth, were also from the islands of Antigua & Barbuda, as was the fourth, Leanna Carrington and Michelle Seaforth.

The two top medallists in Bodybuilding were also from one of the most successful countries in the area. They were both massive and had improved since the last time they came out to compete. Soepe Koese, the PRO killer from Suriname, combines a huge muscle mass with great arms and back with a tiny waist, and when it is trimmed to the maximum, it can’t lose. This is perhaps what separated him from victory, not getting to the limit in his condition. The champion, also from Suriname, was Eddy Wilson, not the pre-pandemic Eddy Wilson, but a super-improved version, in absolutely the best condition we can remember. Bigger, more massive, more ripped and with a muscular balance that makes him the next candidate for PRO WORLD Champion 2022 in Seville.
The City of Alexandria hosted a new edition of the Arab Countries Championship at the end of July 2022. The Egyptian federation, chaired by Dr Abdel Fahim, also Vice-President of the IFBB, summoned the best athletes in the area in this historical worldwide city.

Athletes from Palestine, Saudi Arabia, Algeria, Sudan, Oman, among others were in the registry that was carried out in an orderly manner under the supervision of the IFBB Official Mr. Tarik Kalil, who under the direction of the Executive Director of the EBFF who, Don José Ramos, was also attending the event, were registered a total of 388 competitors.

The Championship received a special visit during the day on Friday. The Governor of Alexandria General Mohamed Taher Elsherief, presided over part of the competition alongside the IFBB directors.

In the sports part in the Classic Physique Category up to 175 cm Elsayed Aiman from Egypt won the gold medal. He highlighted his staging and physical form of him. With a good set-up, he distanced himself from his opponents and after several comparisons, he achieved success.

Bahraini athlete Khalid Jassim Youff won gold in the Bodybuilding category up to 70 kg, ahead of all Egyptian athletes. It was one of the surprises of the day, in a very even category, where the muscle definition and symmetry of the competitor from Bahrain, showed the merit of the prize won.

Another athlete, in this case from Algeria, gave the surprise in the Classic Physique category up to 171 Mohamed Seghir. In a category with 14 Egyptian athletes, he asserted the harmony of his physique that stood out during the final.

A top-level sporting event, led by the staff of the Egyptian Federation, which delighted the spectators. The treatment received by the organization was excellent and all the athletes gave their best to make everyone enjoy a magnificent competition.

ORGANIZED by IFBB official José Monteiro, with support from Portuguese institutions, the Diamond Cup Circuit returned to Portugal from November 19 to 21. **2021 DIAMOND CUP TUNISIA**

**BODYBUILDING CONTINUES TO PROGRESS IN NORTH AFRICA**

“Algeria takes all the overall titles and Abdelhakim Slatnia and Adel Lefkir retain the gold medals achieved at the 2019 Maghreb Championships.”

“Adel Senani (Algeria), overall champion of Bodybuilding.”

— The president of the TFBB, Mr. Guedoura Mohamed Marouene, during the Classic Bodybuilding final (+172 cm), won by Mohamed Belbel (Algeria).

**THE TUNISIAN** Federation of Bodybuilding (TFBB) has consolidated an important sporting activity during the past decade, thanks to its president, Mr. Guedoura Mohamed Marouene. With the gradual overcoming of the Covid-19 pandemic, its activity has begun to recover. After organizing the Maghreb Arab Championships with great success in December 2019, the TFBB once again hosted an international competition, which was held in the country’s capital on November 26 and 27, 2021.

The competition was very disputed, and had many similarities with the 2019 Maghreb championships. The two athletes Abdelhakim Slatnia and Adel Lefkir revalidated the gold medals achieved in Classic Physique and Men’s Physique, respectively, for Algeria – and became overall winners this time.

The I Diamond Cup Tunisia marks another step forward in the relationship between Bodybuilding and the African Olympic Family. The IFBB is recognized by both the Association of National Olympic Committees of Africa (ANOCA) and by the Association of African Sports Confederations (UCSA).

DIAMOND CUP ROME
4TH AND 5TH DECEMBER 2021

ROME HOSTED A NEW EDITION OF ITS DIAMOND CUP ON DECEMBER 4 AND 5, 2021

23 COUNTRIES made up the cast of competitors who met in the halls of the Park Hotel Marriot. The Italian organizational team, led by its President, Mr. Benedetto Mondelo, received all the participants arriving to register on Saturday with open arms. As always, the Italian federation gave a commemorative t-shirt to all participants, to remind everyone that bodybuilding, fitness and healthy lifestyle is alive and well in Italy.

The event kicked off on Sunday morning, with all health measures established by the Italian Government in place. This had been closely overseen by the organization, and was welcomed by athletes, judges and spectators.

Classic Bodybuilding master and senior classes were first out, with Ihar Sidarchuk and Fabrizio de Silvestro proclaimed winners. The latter won the overall title and with it, the precious Elite-Pro card, as well as a spectacular medal designed for the occasion.

In junior bodybuilding the winner was Salvatore Sambito, who later debuted in senior bodybuilding up to 90kg.

The Overall Master went to Roberto Casevecchia after a beautiful fight with his Italian compatriot Fulvio Comoli.

In women's bodyfitness division, Silvia Cecchinato took gold in the master and senior classes, as well as achieving...
the Elite-Pro cards for both, being crowned queen of the division at the 2021 Diamond Cup Rome.

Senior bodybuilding up to 80kg again saw a duel between Nicola Barlota and Alex Zuccaro. After a frenetic fight between the two athletes, current world champion Nicola Barlota took the victory. His great shape and his winning attitude, combined with his flawless choreography, led him to also winning the Overall title.

5 athletes from Brazil, Poland, Italy and Bosnia competed for the Women’s Physique title, giving a rhythmic touch to the female disciplines, with plastic and elegant music and choreography.

The Master Bikini class for over 40 years featured 11 competitors. The Italian Alessandra Santoro won the gold, and later also the overall. Falón Vargas, Alesandra Stantella, Lucille Salvan and Nadia Cainelli won their respective classes in the bikini fitness division. Falón Vargas took the crown of the bikini classes and obtained the elite-pro card.

A great event with a great audio-visual production, thanks to the Italian Federation and its staff, who have once again put Rome in the limelight of the world of fitness.

WE ARE IN BUCHAREST for another edition of the international Tiger Classic event, which is organized by Mihai Tigore with significant help from the officials of the Romanian federation, spearheaded by its president, Mr. Gabriel Toncean. The chosen location was a sports club with a multifunctional room as well as a swimming pool, tennis courts and other sports facilities, where we were welcomed by a climate heralding summer, with more than 30 degrees at noon. The championship was attended by one hundred athletes from fifteen countries.

The Junior disciplines opened the event. In Junior Men’s Physique, the V-shape of the Romanian winner Danut Butilca stood out above the others on the podium, with runner-up Raul Sapataru in good shape and a third-placed Andrei Dimitru with good proportions but lacking mass, something, on the other hand, rather common for juniors. In Bikini, the top 3 was made up in third place by the Romanian Nicola Raluca, tall and with a good presence, the Romanian Anastassia Estroilescu who surprised with her good shape and the Belgian Dorine de Spiegeleer who made her international level clear from the first moment. The Junior Bodybuilding division also had a champion who stood out for his level, Czech Pavel Kutlak, who overwhelmed two Romanians who still need to gain muscle mass to be competitive, Vladut Nicolae Zapis, second, and especially the very tall Adrian Gaitan.

We must highlight the participation of Romanian wheelchair athlete Moise George Gabriel because his quality and muscular size shown make him worthy of being one of the best in Europe in his class.

In Master Bikini, 7 women gathered to give one of the most disputed classes. The Romanian athlete Eliza Oprea took the gold thanks to her lines and her carefully studied pose, followed closely by Virginia Laic and Andreea Savoaia.

The Spanish Jesús Espigares, recent European champion in Master Men’s Physique, won this time against the Romanian Laurentiu Barzila and the British Liam Gol. In BodyFitness Masters, the champion came from Estonia, Karmen Kiier, presenting a fairly balanced physique that made her repeat her victory in BodyFitness against the Bulgarian Emilia Hristova and the Belgian Florence Gerard.

The last Master discipline, Bodybuilding, had the local competitor Leonida Radu Ticau as the clear winner. Ticau is tall and massive with a correct definition and a forceful physique not lacking in kilos or physical...
condition. The Belgian Victor Nastase and the Italian Alfonso Licata accompanied him on the podium.

The Fit Model division has quite a few followers in these European regions, although the champion comes from Malta. Julija Macijevskaya prevailed over the Romanian Virginia Laic and the German Andrea Weisner thanks to her youth and her poses.

The Wellness discipline introduced us to an athlete with quite a future in this specialty, the Serbian Anja Mioc, who prevailed against two very good athletes: Therese Sundseth from Norway and the Czech Veronika Kosskova, all with a great structure for this division. In Classic Bodybuilding, World and European Champion from Spain, Gabriel Manole, clearly prevailed. In the Men’s Physique classes, the champion of -173 cm stood out. Gabriel Biefnot, clearly prevailed over the Romanians Vay Alpar and Florin Ichin. The champion of the -179 cm class was the Romanian Robert Florea, beating the Spanish Jesús Espigares and the Romanian Ionut Braniste. The tallest of the Men’s Physique +179 cms class was won by the Italian Francesco Fasciana, who was also the clear Overall winner. He was accompanied on the podium by Danut Butilca from Romania and Ryan Delia from Malta.

Bikini surprised for its good quality and the short class was won by the Junior champion, the Belgian Dorine de Spiegeleer who triumphed over the Romanians Alexandra Cadar and Mihaela Claudia Nicolesu. Tall size +166 cm was won by the Italian Nadia Cainelli, who prevailed as she also did in the Overall. The two Romanian representatives, Eliza Oprea and Virginia Laic, were the silver and bronze medalists in +166 cm. The Spanish Ibrahim Sifri made a presentation of Classic Physique where he showed a balanced physique. In Bodybuilding up to 80 kilos, Victor Nastase from Belgium won against the Italian Alfonso Licata and the Swedish Ibrahim Sifri. For the heaviest Bodybuilding class, + 80 kgs, it was the Czech Rene Blahovsky who took the gold medal by a narrow margin against the Spanish Gabriel Manole and the Cypriot Dimitry Paraskevos who did not make it easy for the Czech to win. Blahovsky also won the Bodybuilding Overall.

Last but not least, a curious circumstance occurred as the Overall Bikini Champion and the Overall Men’s Physique Champion competed together in Fit Pairs and clearly achieved the victory against Emilia Hristova and Ionut Lucian Carovie, who were silver medalists, and the pair composed of Andreea Weisner and Ryan Delia, who took bronze.
Kamila Pardamcova from Spain got a new pro card in the Master Women’s Bikini discipline.

FROM MAY 27 to 28, the French Federation, led by its President Mr. Mario Valero, held a new edition of the Lyon Diamond Cup at the Espace Convergence facilities in Mions. The winners were the following:

Mr. Mario Valero, President of the French Federation, poses with athletes Tommy Debiere (France) and Francesco Fasciana (Italy), who ranked first and second respectively in the Men’s Physique discipline, earning the right to the Elite Pro card.

Karmen Kiier (Estonia) with her pro card obtained thanks to her second place in the Master Women’s Bodyfitness discipline.

The current European champion in her discipline, the Estonian Agne Kiviselg, first and second classified respectively in the overall Women’s Bikini discipline.

The Italian couple formed by the athletes Nadia Calmelli and Francesco Fasciana won the Fit Model discipline.

The French Simona Leber took the victory (and the pro card) in the Women’s Wellness master discipline.

Christina Popova-Shishova (Bulgaria) was proclaimed the winner in the increasingly popular Fit Model discipline.

Belgian athlete Joseph Peter poses with his pro card in the Classic Physique discipline.

Katarzyna Oleskiewicz-Szuba (Poland) and the current European champion in her discipline, the Estonian Agne Kiviselg, first and second classified respectively in the overall Women’s Bikini discipline.

ONLY the global pandemic could stop the development of a fantastic event started back in 2019, which returned in full force on the same weekend that the attention was focused on the Arnold South Africa and the Rimini Steel Classic in Italy. Perfectly organized in all its details by the international promoter Mr. Csaba Bara, the event came within an Expo dedicated to Fitness that placed Budapest as a point of international attention, being a showcase for the more than 50 local athletes of the Hungarian Federation (MTFSZ), chaired by Mr. Istvan Huber, a valuable collaborator to the event.

THREE WEEKS after the sensational Mr. Universe Europe, which was led by the current president, Roman Hajabac, and held in Prague, the Federation of the Czech Republic (SKFCR) once again brought together a good number of international athletes in the country’s capital for the fourth edition of the Diamond Cup. This time, the event was organized by former president Stanislav Pesat and international official Miroslav Tichy.

With 12 Elite Pro cards at stake, the Top Hotel Prague hosted a competition in which local athletes stood out and, in particular, two very young promises: Karolina Judasova (24 years) and Matej Vaigl (23 years), who took the overall titles in Bikini and Bodybuilding, surpassing athletes like Agne Kiviselg or Jozef Gregus, who are habitual favourites. However, Gregus did not disappoint, achieving gold in the Masters competition and in the Heavyweight (+100 kilos), although he had to give in to the imposing 21 years younger Vaigl.

THOUSANDS of participants and visitors of the Arnold Sports Festival Africa spent an incredible and charming weekend on 3rd-5th, June 2022 in South Africa. The festival included 62 indoor and outdoor sports events, 4 music stages, an open market and many other activities for children and adults. In 2022, the new home of the Arnold Sports Festival Africa became a tent city in an open-air environment comprising 52 large and countless small tents.

This new concept was created by the promoter Arnold Classic Africa Mr. Wayne Price in response to the impact of the Covid Protocols and other restrictions in South Africa limiting spectators and mass gatherings, especially indoors. Moreover, from our point of view, it was a wonderful idea that made it possible to create exciting new experiences for everyone involved. This created a new platform for all sports and communities to share their love and passion with others sport communities, in one space as it was done before and the organizers thus completely fulfilled their slogan: My sport. My art. My passion. The Arnold Classic Africa and the Arnold Classic Africa Elite Pro Show were one of the sporting events. Those exciting events hosted participants from more than 20 countries and their stage fights took place for 3 days. The fantastic stage with excellent lighting was placed in one of the large tents, and the competitors found a background with refreshments in a nearby smaller tent, which ensured their privacy.

Cups and medals were prepared for the medallists, which will allow them to recall their wonderful weekend at every sight. We are ready to go back there again next year and we hope you will be there with us!

2021 IFBB INTERNATIONAL FITNESS SHOW & FEMALE FITNESS WORLD CUP

DUBAI AGAIN BRINGS TOGETHER HUNDREDS OF ATHLETES IN A FABULOUS DOUBLE EVENT

“Khalifah Alhmoudi, star of the men’s competition with 4 gold medals and the overall titles in Classic Physique and Classic Bodybuilding.”

“A resident of the UAE, Wassim Hassan, was the overall champion of Bodybuilding.”

“Total success of the Fitness World Cup, dominated by athletes from Russia: Alina Frolova (Bikini), Natalia Filipova (Bodyfitness) and Snezhana Garshina (Wellness).”

Khalifah Alhmoudi was proclaimed overall champion of Classic Bodybuilding and Classic Physique, achieving 4 medals.

Promoter Bassem Jawhary, a promoter of Fitness and Bodybuilding in the United Arab Emirates, together with the two best athletes of Classic Physique: Hossein Mansoor (runner-up) and Khalifah Alhmoudi (winner), one of the stars of the competition.

BODYBUILDING

CLASSIC BODYBUILDING

The athletes from the Persian Gulf dominated the competition, showing that this is one of their specialties, supported by their aesthetics. The overall victory went to the favourite: local athlete Khalifah Alhmoudi, who had already won the title weeks ago, at the IFBB Dubai Muscle Classic. Alhmoudi, weighing almost 92 kilos for a height of 185 cm, was the tallest and most complete athlete in the division.

CLASSIC PHYSIQUE

The growth of this division was evident in Dubai, seeing the number of participants. As many as 3 champions of Classic Bodybuilding managed to repeat the gold medal in this discipline, that admits a greater muscular size. Fouad Mhmood (Iraq), Hossein Mansoor (who competed under the IFBB flag) and, again, the big favourite, Khalifah Alhmoudi, were the kings of the competition.

Special mention to Khalifah Alhmoudi, who also won the overall title. With 4 gold medals, he became the most successful athlete in the competition.

THE UNITED Arab Emirates Bodybuilding Federation (EBBF) chaired by His Excellency Sheikh Abdullah bin Hamad bin Saif Al Sharqui, and the dynamic promoter Bassem Jawhary joined their organizational capacity to end the 2021 IFBB season in Asia from December 7 to 12. They did so with a sensational double event in which athletes from all continents participated, with the exception of Oceania, due to restrictions on international travel.

The IFBB Female Fitness World Cup featured Bikini, Bodyfitness, Wellness Fit Model, Fit Pairs, Acrobatic Fitness and Artistic Fitness disciplines, and the IFBB International Show featured Bodybuilding, Classic Physique and Men’s Physique. Both events were a resounding sporting and participation success, consolidating Dubai and the EBBF as outstanding protagonists of our sports.
MEN'S PHYSIQUE

The Star discipline in the Emirates again summoned dozens of athletes. We discovered new stars, such as Juma Mubarak (32 years; 174 cm), who won the Middle class against 17 other athletes, and the overall title against 5 other champions. Among them, there was Mubarak’s compatriot Ali Dawi Alnaqbi, who repeated the title in the Super Tall class achieved at the recent IFBB Dubai Muscle Classic, and did it with a perfect score from the judges (15 points).

The high participation of athletes brought together competitors from countries such as the Seychelles, with gold medal for Mervin D. Dugasse, Costa Rica, Ghana, Pakistan, Palestine, Kazakhstan or Portugal.

Mikhail Dyadyuk (Russia) was the winner of Heavyweight Bodybuilding (+100 kilos) and the overall runner-up.

The Bodyfitness competition, dominated by Russian athletes, had a very high level. In the picture, Natalia Filippova celebrates her victory, congratulated by her compatriots Elena Kuzkina (silver) and Ekaterina Sakhautdinova (bronze).

Wassim Hassan (UAE Resident) was the overall champion of Bodybuilding, after prevailing in the Super-heavyweight class, with his physique of 103 kilos of muscle.

Alina Frolova (Russia) was the overall champion of Bikini. In 2022 we’ll see her competing in the Elite Pro Division.

World Master Champion on several occasions, Anna Prokhorova, 50, achieved another title in Dubai and proved to earn a place in Bikini Fitness history.

The IFBB Female Fitness World Cup was a success, and Dubai the ideal place for its growth. The United Arab Emirates is an international point of reference in the sports field, also for women’s disciplines. The organizer, Basssem Jawhary (left), has been promoting a healthy lifestyle and fitness competitions for years.

The 2021/2022 BOOK OF THE YEAR 2021/2022 BOOK OF THE YEAR
SWEDEN has once again placed itself at the forefront of international activity, with the 1st edition of the Nocco Pro Qualifier held in Stockholm on April 9 and 10. This show is a continuation of the Tyngre Classic that reached its 11th edition in the previous hours. The event reflects the excellent communication between the Swedish Federation (SBFF) chaired by Mr. Jani Kaaria and the promoter Mr. Alex Danielson, with the support of an international Fitness reference such as Ms Jan Tana.

The weekend mobilized a good number of European athletes for an amateur event that distributed 6 Elite Pro cards, as well as more than $10,000 dollars in prizes for professional athletes from America, Africa and Europe. The most important thing, though, was to discover the dynamism of the Nordic countries and the organizational capacity of this sports project that was able to attract more than 50,000 viewers via streaming during the weekend.

With the leadership of athletes from Finland and Sweden, the competition left us the following results:

HELD IN HAMAR from April 22 to 24, in the magnificent facilities of the Hamar Kulturhus, the first edition of the IFBB Norway Grand Prix ended with a more than positive result, thanks to the excellent organizational work of the Norwegian Federation, headed by its president Elise Murbaeck.

The championship had a large crowd, as well as professional coverage of the event via streaming. These are the results:

- Christer Hoftvedt (Norway), obtained her Elite Pro card by winning the Bodybuilding overall.
- The winner of the Women’s Wellness discipline, Kristyna Flidrova (Czech Republic) poses with her pro card.
- Estonian athlete Ell Valla with her Elite Pro Bikini Master card.
- Local athlete Hanne Eide poses with her Elite Pro card, which she achieved by coming in second in the Women’s Bikini overall.
- Stian Solgard (Norway), winner of the Classic Bodybuilding discipline.
Agne Kiviselg (Estonia), one of the outstanding athletes this season, with her pro card in Women’s Bikini, thanks to her victory in the overall.

Annika Roland, representing Norway, ranked first in the Women's Bodyfitness overall, which rewards her the Elite Pro card.

The overall winner in the Men’s Physique discipline, Ronnaphum Angkaew (Norway), poses with his Elite Pro card.

The Norwegian Monica Foss got the Elite Pro Master card in Women’s Bodyfitness.

Nasradin Zakaria (Norway), second classified in the overall Men’s Physique.
ON THE AFTERNOON of May 1, Jose Manuel “Kuto” was the brilliant host to the first international edition of the Cacique International, with the invaluable collaboration of the Puerto Rican Federation of Bodybuilding and Fitness, represented by its president Carlos Diaz. All members of the Puerto Rican federation turned to help for the 2022 Cacique International, so it could be at the height of an IFBB international event, which it no doubt was. Held together with a national championship for Rookies, juniors and Masters, it brought together a large and enthusiastic crowd in a beautiful and perfectly conditioned auditorium for the development of competitions in our sport.

The following athletes won the Elite PRO cards:

Jayson Velez Cruz, Overall champion in Mens Physique. He has a classic body with a great development for this discipline, with adequate insertions, clavicular width, a small waist and good abdominal relief. Cruz is an athlete who knows how to show himself, and he prevailed over the rest with remarkable clarity.

Giselle Velez Perez, Bikini Overall champion. Velez presented the most worked physique of the entire discipline. Nothing stood out, which means that it was her muscular balance both in development and in tone and definition that made Giselle the champion by unanimous decision of the judges.

Sacha Rodriguez, Overall Wellness champion. She presented a physique that will be well received in the PRO world as soon as she manages to polish it. The proportions presented are already those that we see in many of the best Wellness athletes in the Elite PRO professional world.

Christopher Rodriguez, Overall Winner in Classic Physique, was the pleasant surprise of the afternoon, a magnificent representation of this discipline on the American continent: muscular quality with details that are rarely seen today. He showed an outstanding definition that did not hide his good proportions and his excellent muscle quality. We will surely see him in the future obtaining medals for Puerto Rico in upcoming events.

We are waiting for the next edition of this Cacique International to be even better than the one we have witnessed in 2022. This is a sign of the good work of both federation and organizers, and the potential of Puerto Rico as a bodybuilding nation continues to grow inside and outside of its borders.

We are convinced that the 2nd edition, which will also take place in Sibiu, in 2023, will be one with even more participation and will become a competition that the athletes will highlight in the international IFBB Calendar of Events.
IN THE BEAUTIFUL city of Ambato, Ecuador, the 2022 edition of the IFBB Miss & Mister America Cup was held.

With the customary hospitality of the Ecuadorians and with the always willing collaboration of the Ecuadorian Federation, the event was held with the presence of the Ministry of Sports and the Sports Federation of Tungurahua, and more than 220 athletes from: Colombia, Guatemala, Ecuador, Dominican Republic, Argentina, Peru, Costa Rica, Chile, Brazil, Venezuela and Iceland, who competed for 7 IFBB Elite Pro cards and $10,000 dollars in prize money.

The opportunity was taken to pay an emotional tribute to the late Professor Ángel Coba (RIP), founder of the Ecuadorian Federation. Among the highlights, we’d like to mention the performance of the delegation from the Dominican Republic and Guatemala, regular participants in international events held in South America.

Next year the appointment is in Peru, where we’ll be waiting for you!

The professional athlete Rubiel Mosquera performed an exhibition for the fans of India.
ROMAN HAJABAC is everything to this event. From being the organizer of previous editions to recently being elected president of the Czech Federation, a federation with a team that carries out an intense competitive programme with more than 200 competitors in the Amateur event, plus a PRO event of great relevance. The Hilton Hotel with its conference rooms is one of the best settings, well remembered from previous occasions that the Czech Republic has hosted IFBB International events.

As for sports, after highlighting the wide participation of competitors, it’s also worth highlighting the quality of many of them and the significant number of participating countries: more than 25, which makes this event more international than ever. In the Fit Model discipline, the winner Lucie Klvanova from the Czech Republic combined a well-rounded physique with her youth, which made her rise to victory. In overall Men’s Physique, the Swedish Sebastian Jansson won thanks to a very balanced physique, where his V shape and his good pose led him to victory against the Czechs Pavel Vasek, second, and Martin Horak, third.

The Swedish Chris Harnell, European champion in Master Men’s Physique, imposed his body over a large line of competitors, who could do little against his forceful physique. In Muscular Men’s Physique, the Slovakian Adam Csik won, with a very remarkable V-shape and security in his pose.

In Bikini Beginners, local celebrity Hana Maslikova-Reinders was the winner to the acclaim of her fans. The also Czech Petra Simova won the master class from 35 to 39 years, and competed for the overall against the Slovakian Zazana Satmaryova who won the Bikini Masters +40 years -168 and against the champion +40 years +168, Sylvie Moocova from the Czech Rep. The Overall champion was the latter, in a very tough battle with her opponents.
In Bikini Junior age, the Serbian Milena Miletic, only 17 years old, won against a cast of excellent Czech and Slovak competitors. Her youthful physique with excellent lines, adequate tone and the ideal size for Bikini made her champion also in the senior discipline, and third in the Bikini Overall, which is impressive for her age. The Italian Nadia Cainelli, also a champion of her class, was second in the overall with a physique with narrow hips and V shape, and good work in posing. It was the Estonian Agne Kivilseg who imposed her seniority and her excellent physique as well as being the best poser in the discipline. Her posing really enhances her body in each of the poses, with angles that flatter all her muscle groups.

In Fit Pairs, the Lithuanians Tomas Petrenas and Dovile Paulaviciute, who was also champion in the tall Bikini class, was the couple that finally won against the Italians Nadia Cainelli and Francesco Fasciana, a very difficult couple to beat. In the Wellness division, the Czech Junior Natalia Kolenickova presented a forceful physique for her age. The Master Wellness was won by Czech Eva Rudina, who was also the Wellness Overall winner, tall and with right size legs/buttocks. She imposed her seniority in her pose ahead of the also Czech Marketa Hartl.

In Classic Physique Junior, Pavel Dostal from the Czech Republic was the champion, while the also Czech Boris Palovic was the champion in Master, thanks to his excellent physique, if he only adds some size to his legs, he won’t give anyone an option. Palovic was also champion in Classic Bodybuilding senior. In the Overall of Classic Physique we had two great contenders: Mohamed Ali’s worked physique, with excellent definition, muscular balance and a great poser – and the Belgian Joseph Peter, with a classic, harmonious, pumped physique, with a big V and an equally classic pose. Peter convinced the judges to make him the overall winner.
In Junior Bodyfitness, the Slovakian Kristin Krajcovicova prevailed, as well as the Estonian Karmen Kiier, whose quality also won in senior and made her second in the Overall against the Slovakian champion Agatha Hlavackova, who won with a physique worthy of a PRO: a worked body, but with great V shape, good legs, definition, pose and just the right size to take a big step forward in her career. In Women's Physique, the Czech Veronika Vojtiskova convinced her with her balanced physique, her fair size, her correct definition and good proportions for the division.

Finally, in the Bodybuilding Division we saw rookie Tomas Krajovic from the Czech Republic win first place. In Junior, a huge physique, with huge arms and legs, was also second in senior heavyweight: the Czech Matej Vaigl did not leave anyone indifferent. Remember his name. In Masters 40-44 years, the Czech Tomas Mach beat a good squad of masters in good shape, also winning the overall ahead of the Polish +45 years Master champion Slawomir Szafranski.

In the Bodybuilding Overall, we enjoyed the great quality shown by the heavyweights. The runner-up of Classic Physique Overall (champion of his discipline), Mohamed Ali, was third in the overall, making it clear that his -90 kgs weight is also competitive in Bodybuilding. The second in the Bodybuilding Overall was the Czech Heavyweight Champion Martin Horky with a line that will give him much joy in the future: tall and with an elegant physique, he showed great legs, shoulders and arms. So, once he fills out his back and chest, he will be a PRO with all the guarantees. The overall champion was the Polish Kamil Banas, who left the rest without an option.
thanks to his great muscular size, good abs, great legs and arms that convinced the jury after a hard fight with the Czech Horly.

The PRO event began punctually at 9:00 p.m., and featured 12 Bikini athletes in one of the best competition lines in memory. Great equality made it very difficult for the judges. The champion was the Czech Renata Souckova with a balanced physique, small waist, shapely muscles with the right muscle tone and a great presentation, who prevailed over the also Czech Jana Jerabkova, taller and with pleasant proportions, elegant pose and ideal muscle tone for the discipline. In third place was her compatriot Monicka Spackova with a little more form. Her presentation was excellent, perhaps with a little less tone but with a balanced physique.

In Male Bodybuilding we had an excellent cast, with the confirmation of Domenico Intermaggio as one of the favourites for this 2022 season with events throughout the world. The German lacked leg size to match his massive torso, though with excellent definition, he has finally done his homework and his quads are a match for his massive and chiselled physique. Congratulations! Local favourite Pavel Koukal has taken another step forward: last year he already amazed us with his great improvement, but this year, he’s done it again and without any muscle group that stands out, which makes him beautiful and full of chances for this 2022 season. The Colombian giant Rubiel Mosquera did not come in ideal shape for the competition, but his progression in recent weeks makes him worthy of being feared. His privileged genetics scares and amazes the whole world of bodybuilding. His legs are indeed out of this world!

2021 IFBB ANNUAL CONGRESS

With the Covid-19 epidemic evidently going to the end, IFBB worldwide family exploded with joy and enthusiasm, creating the biggest ever World Championships, with over 1300 participating athletes and 102 countries present at the Congress!

IFBB President, Dr. Rafael Santonja, perfectly expressed these general feelings in the introduction to his annual Congress Report, saying – “These World Championships joins us all together, in this difficult period that we are passing, in which every opportunity to meet around sport and friendship give us, more than ever, inspiration and hopes.”

To recognize Santa Susanna authorities, IFBB President continued – “I wish to make a special mention to Mr. Joan Campolier, the Mayor of Santa Susana, also IFBB Patron. In difficult times, everybody wants to be at home, and during these two years of Pandemic, Santa Susana, has been, as always, but this time more than ever, our home, and has been the host of this year (also last year) IFBB greatest events.”

Maybe, many participants asked themselves why the IFBB greatest events could be staged in Santa Susanna during this difficult time, but not in other, bigger cities? Dr. Santonja commented this matter briefly – “Thanks to the support of the city in the application of the highest healthy protocols, keeping athletes and officials in a security bubble applied in hotels, transportation and venues, with the supervision of the IFBB Medical Commission.”

President Santonja also emphasized other important information connected with the 2021 Congress – “This year, is a very significant occasion, as we are celebrating the 75th anniversary of the IFBB, which, as you all may know, was founded in Canada in 1946, by the brothers Ben and Joe Weider.”

In further part of his Report, President Santonja reviewed, month by month, dozens of his international trips and meetings with the top sport officials of the world, included so influence sport organization like the XXV General Assembly of the World Association of National Olympic Committees (ANOC) or Central American and Caribbean Sports Organization (CENTRO CARIBE SPORTS).

200 countries barrier broken! This was possible by approving the memberships of National Federations from the following new countries: Tanzania, Gabon, Benin, Saint Thomas and Prince. By this, the number of the IFBB-affiliated countries raised up to 203. Not coming back to the very beginning (with 2 countries: USA and Canada), do you remember times with 60 (necessary to enter GAISF in 1971) or 125 members in 1984? Who then dreamed about 200? Now it happened!

Mr. Universe is back! This decision should be warmly welcomed by the physique sport fans around the world. IFBB decided to organize five Mr. Universe events per year, one in each of the continents. And this goal has already been achieved in 2022! Moreover, other famous event from the past - “Night of Champions” will also be reinstated!

Our tremendous progress in the Americas! IFBB officially participated or will participate in 2022/2023 in the following prestigious regional Games: Pan American Games (Lima, Peru), South American Games (Asuncion, Paraguay), Central American and Caribbean Games (Panama City, Panama).

Among other continents, good news came from Asia/Africa: IFBB will participate in the 2023 Pan-Arab Games (Bagdad, Iraq).

New IFBB sport division: Fitness Challenge. At the IFBB Bodybuilding and Fitness events we can see athletes displaying their body shape, muscle development and quality. Now, with Fitness Challenge category, all these athletes and fitness enthusiasts that are in the gym, lifting weights or doing exercises with their body weight, will have a Fitness Challenge event to demonstrate on the stage their
strength and endurance. Fitness Challenge consists in a circuit of 6 exercises, and allow the competition individually, by couples and/or by teams. Beside Bodybuilding and Fitness, this new division will be a "trump card" at the Fitness Sport Games promoted by the World Fitness Union.

Being recognized by FISU (International University Sports Federations), IFBB established its own University Sports Commission headed by two experienced IFBB officials in this area: Eng. Eduardo Abdalah (Nicaragua) and Dr. Abdolmahdi Nasirzadeh (Iran).

At the 2021 IFBB World Championships and Congress, athletes from all over the word were excited to show themselves on the stage and officials were looking forward to meeting each other's, to enjoying the IFBB World Championships, and to discussing the current topics. Probably, it was the reason that so many proposals were sent and analyzed at the Congress.

An important decision made by the Congress was the approval of the Executive Council proposal to stage one big World Championships, included all female and male juniors, seniors and masters divisions and categories, as well as the IFBB International Congress. This is a big challenge for promoters as such an event should last 4 competition days at least but will reduce the costs of participation (one trip, one flight, one hotel, one visa arrangement, easier and cheaper crossovers), increase attendance at the Congress and make the event more attractive for viewers, sponsors and media. Separated events may remain in case of convenience and request.

In this point it is noteworthy that more and more IFBB events may be watched at home via the live streaming transmission. This enables fans all over the world to select and watch their favorable categories.

One of the top matters discussed was the Fit-Model division development. Finally, Congress approved new category: Master Women Fit-Model over 35 years old and increased the number of Women's Fit-Model categories to 5, so currently there are the following categories: 160 cm, 164 cm, 168 cm, 172 cm and over 172 cm.

Regarding Men's Fit-Model category, the Congress instructed the Judges Committee to propose modifications regarding the attire for both rounds.

Other important change in the Technical Rules was the removal of height/weight limits in Men's Fitness. Several years' experience showed that excessive muscle mass has not become a problem in this division, and it is expected that this decision may be more attractive for athletes.

Nowadays there are in the IFBB two categories for couples: recently introduced Fit-Pairs (with no posing routine) and much older Mixed-Pairs (with the routine). Judges Committee proposed to score the mandatory poses and the routine on a 50-50 basis and this proposal was approved. In consequence, routines will also be performed in the semifinals (previously it was performed only in the finals), so couples with good routines will have more chance to qualify to the finals.

And one more change in the number of categories: Muscular Men's Physique division now will have two body height categories: up to 179 cm and over 179 cm instead of one open category. Time will show if this separation height limit was properly established.

One way of promotion of our sports is through big, spectacular events and great champions but the other way, also very important, is to promote the weight training and fitness healthy lifestyle. This job has been done perfectly by the IFBB Academy, which covers over 30 countries and teach people how to execute exercises properly, how to design workouts and nutrition, how to prepare for the contest and much, much more.
